

OUR PATIENTS
COME FIRST

January 16, 2017

Dear Colleague:

As you know, to date, we face a challenge of keeping our patients from visiting the Emergency Department (ED) for non-urgent matters. Due to high demands from health plans to lower ED visits, UOP has opened an Urgent Care facility. We are opening the UOP Urgent Care with the hopes of decreasing ED visits, which will help achieve our goal of lowering healthcare costs, increasing healthcare quality and enhancing patient satisfaction.

UOP continues to search for opportunities to benefit you and your patients. The UOP urgent care will help bridge the gaps between illnesses that cannot wait for an appointment with our patient's primary care physician. UOP aims to deliver professional health care that is convenient for your patients. With the start of the UOP Urgent Care, we believe this will aid our goal.

The Medical Director, Yasser Attalla, MD, ensures refined communication between the Urgent Care and our physicians. An after visit summary will be sent to the patient's PCP each time the patient is seen at our facility. Also, UOP Urgent Care will refer our patients to UOP providers who are accepting new members. If you are a provider that is interested in accepting new members, contact UOP. UOP Urgent Care welcomes patients effective **January 9, 2017**.

UOP Urgent care will be located on [23822 Ford Rd. Dearborn Heights, MI 48127](https://www.google.com/maps/place/23822+Ford+Rd,+Dearborn+Heights,+MI+48127).

Phone: 313-277-4330 **Fax:** 313-277-4338. **Web:** www.uopurgentcare.com

Sincerely,

Yasser T. Hammoud, MD
Medical Director
